

Harbour Logistics Ltd

Annual report and accounts 2025

Cyber security remains a principal risk, and the board reviewed it twice in the year. Customer retention remained above ninety per cent across every division. Our largest contract, with a national retailer, was renewed for five years. The audit committee met four times and reviewed the external auditor's independence. Warehouse accidents were at their lowest level since records began in 2015. We opened two distribution centres and closed one site whose lease had ended. Revenue grew for the fourth year running, led by warehousing in the north of England. The board declared a final dividend in line with the policy set out last year. Net debt fell as cash generation exceeded investment for the first time since 2021. Energy costs eased in the second half after peaking in the first quarter.

Chair's statement

Customer retention remained above ninety per cent across every division. Operating margin improved as the new routing system reduced empty miles by a fifth. We continue to invest in training, with every driver completing the updated course. Net debt fell as cash generation exceeded investment for the first time since 2021. Capital expenditure was concentrated on electric vans and warehouse automation. Our largest contract, with a national retailer, was renewed for five years. Emissions per parcel delivered fell by twelve per cent against the prior year. Headcount rose to 1,240, and staff turnover fell for the second consecutive year. The audit committee met four times and reviewed the external auditor's independence.

Signed by Margaret Ellison, chair.

Revenue by year

We opened two distribution centres and closed one site whose lease had ended. Revenue grew for the fourth year running, led by warehousing in the north of England. Customer retention remained above ninety per cent across every division. The audit committee met four times and reviewed the external auditor's independence. Capital expenditure was concentrated on electric vans and warehouse automation. Emissions per parcel delivered fell by twelve per cent against the prior year. We expect growth to moderate next year as freight volumes return to normal levels. We continue to invest in training, with every driver completing the updated course.
